Epson, it is announced, has succeeded in looking through a man, seeing the workings of his heart, lungs and other organs, and the Exprese, in commenting, remarks that if the di-coveseries with the X rave shall enable observers to see into some men's thoughts, some very remarkable exhihitians may be expected in the future.

THE King as Abysettis is not in baste to meet Italy's praceful overtures. He now thinks he can not get down to a peace basis unless he is awarded an indemnity of 40,000,000 lira (about \$8,000,000) from Italy. Italy being on the cerge of bankruptcy, and her people nearly frenzied and impressive speaker, and a large by the losses that have already been sustained, are not at all likely to receive the new demand in a gracious about it?

WHAT is said to be the beggest thermometer in the world has been placed in front of the Pultzer building in New York. The extreme length of the frame is fifteen feet and its wilth eixteen inches. The length of the gla s tube and bulb is between twelve and thirteen feet, and the tube itself is on inch in diameter, with a kore for the dark blue colored liquid spirits with which the thermometer is filled of an inch in width. The big bulb is twelve inches long by three and onehalf inches in diameter.

A newspaper in a neighboring town says the London (Ohio) Democrat reports that a man who believes in the old saying, "see a pin and pick it up, and all day long you'll have good luck" morning. Bending down to get it his hat tumbled off and rolled into the ditch; his eveclasses fell and broke on the pavement; his suspenders gave way behind; he buret the buttenhole on the back of his shirt coller, and he all but lost his new false teeth. He got the pin.

Hon, Whitelaw Reid, editor of the New York Tribune who has spent the winter just past at Phoenix was recent ly interviewed by a representative of the Los Angeles Hereld, and we copy a paragraph from the correspondent's report of the conversation. In reply to the question, "What do you think of Arizona, Mr. Reid said :

"It is a country of great possibilities with a great future. I have acquired an abiding faith in her properity eince I became better acquainted with her resources during my soj surn here. All that is needed is money and water. The one is as needful as the other and whi'e both are requisite they must needs be most judiciously mixed. Money and water backed by good judgment and the resources of Arizona and there is almost no limit to the returns. As to Popenix us a health resort I can only speak from my own experience and what I have regained here is most gratifying. For some years I had been troubled with asthma, and in '91 thought myself quite cured of it but the severe strain during the campaign of '92 brought it en again. I came here last November for absolute quiet and relief from bussiness-that is one reason I object to being interviewed; if I begin I must keep it up-and with the result that I am now quite a well man, practically free from asthma. La fact I think,
